MES2324

MES2324FB

MES Access switches are the managed L2+ switches with 24 10/100/1000Base-T ports and 4 10GBase-X (SFP+)/1000Base-X (SFP) ports.

Switches are designed to connect end user to large-scale corporate networks, small and medium business networks, and to the service provider networks using Gigabit Ethernet interfaces.

Switch functions include physical stacking, VLAN support, multicast groups and advanced security functions.
